BLS - \$65

Code - CCMSBLS

ACLS - \$180

Code - CCMSACLS

ACLS/BLS Combo \$240

Code - CCMSCOMBO

About Us

Collier CPR is excited to announce that we are partnering with CCMS to offer AHA certification courses for physician members and their staff. Through this partnership, we are committed to providing high-quality training in a format that is both efficient and thorough, ensuring that you receive the certifications you need without compromising on the essential skills and knowledge.

Courses Offered:

- **Basic Life Support (BLS)**
- **Advanced Cardiac Life Support (ACLS)**

Class Details: Our courses will be streamlined to cover all the critical information required for certification, focusing on the most pertinent skills and protocols. While these courses are traditionally longer in duration, we have tailored them to fit your busy schedules without sacrificing the depth of instruction.

Key Topics Covered in ACLS:

- **Basic Life Support (BLS) Skills:** Review of CPR, AED use, and airway management.
- **Recognition and Early Management:** Identifying and managing cardiac arrest, acute coronary syndromes (ACS), stroke, and other life-threatening emergencies.
- **Pharmacology:** Understanding and administering ACLS medications.
- **Megacode Practice:** Real-time application of ACLS knowledge through simulated scenarios.
- **Management of Respiratory Emergencies:** Techniques for addressing respiratory distress, failure, or arrest.
- **Stroke Recognition and Management:** Identifying stroke signs and necessary interventions.
- **Post-Cardiac Arrest Care:** Stabilizing patients after a cardiac event.
- **Bradycardia and Tachycardia Management:** Protocols for treating abnormal heart rhythms.

Important Information: Prior to attending the ACLS course, all participants are required to complete a Precourse assessment. This step is crucial for ensuring that everyone is prepared to engage with the material effectively. A completed certification from this course is necessary to obtain your ACLS card. Access the Precourse assessment at

<https://elearning.heart.org/course/423>

For any questions regarding scheduling or class specifics, please feel free to contact Giovanni Campobasso directly at Gio@colliercpr.com or 239-302-9695.
